

Roshan Pandit

Backend-Oriented Full Stack Developer

India | roshanpandit1124@gmail.com | +91 8285362898

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Backend-focused Software Developer with strong foundations in Java, Data Structures & Algorithms, REST APIs, and scalable web applications. Experienced in building full-stack projects using Node.js, React, PostgreSQL, and MongoDB. Passionate about writing clean, efficient, and maintainable code.

Technical Skills

Languages: Java, C++, C, JavaScript, TypeScript

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases: PostgreSQL, MongoDB, Prisma ORM

Authentication: JWT, OAuth, NextAuth, Bcrypt, Zod

Tools: Git, GitHub, Docker, Redis

Concepts: Data Structures & Algorithms, OOP, DBMS, CN, API Design, Caching, Pub-Sub, System Design, OS Fundamentals

Projects

Real-Time Multiplayer Chess Platform

Next.js, WebSocket, Redis, Microservices

- Built a real-time multiplayer chess platform with WebSocket-based move synchronization.
- Used Redis Pub-Sub for matchmaking, game events, and inter-service communication.
- Designed microservices for authentication, matchmaking, and game management.
- Developed a scalable event-driven architecture supporting concurrent matches and horizontal scaling.

Playfy – Scalable Music Streaming Platform

Next.js, Node.js, PostgreSQL, Prisma

- Built a full-stack music streaming platform with playlist management and optimized REST APIs.
- Implemented efficient database queries and caching strategies for improved performance.
- Designed scalable backend architecture capable of handling concurrent user requests.

SketchFlow – Real-Time Collaborative Whiteboard

Next.js, WebSocket, Redis

- Developed a collaborative whiteboard with multi-user synchronization using WebSockets.
- Implemented Redis Pub-Sub architecture for low-latency real-time communication.
- Designed a scalable event-handling system supporting future horizontal scaling.

Second Brain – Knowledge Management System

React, Express.js, MongoDB

- Built a centralized platform for organizing notes and resources with secure access control.
- Designed RESTful APIs and optimized database schemas for efficient querying.
- Focused on extensible backend architecture and maintainable code organization.

Problem Solving

- Strong foundation in Data Structures and Algorithms including Arrays, Linked Lists, Trees, Graphs, Dynamic Programming, Greedy Algorithms, Sorting and Searching.
- Regularly solve coding problems focused on algorithmic thinking, optimization, and complexity analysis.
- Experienced in analyzing time and space complexity to design efficient and scalable solutions.

Education

B.Tech – Information Technology

Expected 2027

Dr. Akhilesh Das Gupta Institute of Professional Studies

CGPA: 8.92 / 10
